PROFESSIONAL SUMMARY

Performance-driven **Mobile Software Engineer** with proven hands-on experience architecting and shipping cross-platform applications using **Flutter, Dart, and Kotlin**. Proven track record in enterprise workflow digitization at **PT Charoen Pokphand** and leading technical sprint delivery for cross-campus initiatives. Master of Computer Science student equipped with deep expertise in MVVM/Clean Architecture, low-latency Firebase ecosystems, and Google Gemini AI integrations, dedicated to delivering robust, scalable, and responsive digital products.

PROFESSIONAL & PROJECT EXPERIENCE

PoeLife (Cross-University Platform)

Technical Project Lead & Mobile Developer

Jakarta, Indonesia

Sep 2025 – Feb 2026

- Spearheaded technical direction and sprint deliverables for a 4-member developer team at BINUS University, establishing Git branching workflows and code review standards while coordinating cross-campus pilot testing with Malaysian partner institutions.
- Architected core client architecture using Flutter with Riverpod state management and Express.js RESTful APIs, enabling reliable real-time feed updates and seamless data handling for student pilot users.
- Engineered generative AI capabilities via Google Gemini API and Firebase, deploying conversational features that elevated user retention and interactive language practice.
- Refactored application UI/UX into modular, reusable widgets based on multi-campus user feedback, improving overall app responsiveness and visual consistency across diverse mobile devices.

PT Charoen Pokphand Indonesia

Mobile Developer Intern

Jakarta, Indonesia

Feb 2025 – Aug 2025

- Engineered core modules of **"MyHatchery"**, an enterprise Flutter mobile application designed to transition manual paper inspection logs into a unified, real-time operational system.
- Built end-to-end features for egg incubation tracking, batch lifecycle monitoring, and dispatch logistics, integrating Firebase Firestore with offline-first persistence to guarantee data integrity in farm environments.
- Collaborated directly with plant supervisors and cross-functional teams to translate complex operational workflows into intuitive mobile interfaces, accelerating daily field reporting and inventory visibility.
- Enforced Clean Architecture (MVVM), SOLID principles, and dependency injection, establishing a robust codebase designed for enterprise scalability and seamless feature additions.

EDUCATION

Universitas Bina Nusantara (BINUS University)

Master of Computer Science (Magister Teknik Informatika) | GPA: 3.83 / 4.00

Jakarta, Indonesia

Nov 2025 – Jan 2027 (Expected)

- Track:** Flexible / Evening Class Schedule (Fully available for full-time professional commitments).
- Focus Areas:** Applied Machine Learning, Internet of Things (IoT), and Technology Risk Assessment.

Universitas Bina Nusantara (BINUS University)

Bachelor of Mobile Application & Technology | GPA: 3.67 / 4.00

Jakarta, Indonesia

Aug 2022 – Oct 2025

- Merit Scholar:** Hypernet Technologies Scholarship Recipient (XL Axiata Group) for technical and academic excellence.
- Academic Project Lead:** Directed multi-platform projects including "Puff & Poof" (E-commerce) and "InsightED" (AI Major Advisor) using Kotlin, Flutter, and Firebase.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

BINUS English Club (BNEC)

Information Technology Staff

Jakarta, Indonesia

Sep 2023 – May 2024

- Maintained deployment workflows and server availability for the official BNEC website, supporting 500+ student members.

B-Preneur (BINUS Entrepreneurship Club)

Active Member

Jakarta, Indonesia

Sep 2023 – May 2024

- Participated in business incubator workshops, analyzing MVP software architectures and tech product-market validation.

TECHNICAL COMPETENCIES

- Mobile Development:** Flutter & Dart (iOS, Android, Web), Kotlin, Android SDK, Swift Basics, Cross-Platform UI/UX, Reusable Widgets
- Architecture & State:** Riverpod, GetX, BLoC, Clean Architecture (MVVM), SOLID Principles, Dependency Injection, OOP
- Backend, Cloud & AI:** Firebase (Firestore, Authentication, Cloud Messaging), Google Gemini AI API, Node.js (Express.js), Supabase, REST APIs
- Tools & Methodologies:** Git, GitHub, CI/CD awareness (GitHub Actions), Flutter DevTools, Unit & Widget Testing, Postman, Agile/Scrum
