Results-driven Mobile Engineer and Master of Computer Science (MTI) student at Bina Nusantara University with a proven track record of architecting scalable, production-grade applications. Proficient in Flutter, Dart, Kotlin, and Swift, with deep expertise in MVVM/Clean Architecture, SOLID principles, and complex RESTful API integrations with Firebase and Supabase. Demonstrated strong product ownership by digitizing 80% of hatchery workflows at PT Charoen Pokphand Indonesia and leading cross-border development for PoeLife featuring Google Gemini AI integration. A merit-based Hypernet Technologies (XL Axiata Group) scholarship recipient equipped with strong analytical problem-solving and public speaking capabilities, dedicated to delivering impactful, high-performance software solutions.

Pengalaman Kerja

Freelance (Project: PoeLife) - Jakarta, Indonesia Sep 2025 - Feb 2026

Mobile Application Developer / Instructor

PoeLife is a social platform similar to Twitter/X, designed for users to express thoughts and feelings in English, targeting students from BINUS University and partner universities in Malaysia.

- Led and mentored a cross-border development team of junior programmers to build a Flutter-based social platform for university students in Indonesia (BINUS) and Malaysia, ensuring high-quality code standards and timely delivery.
- Architected a scalable mobile-backend ecosystem using Flutter (Riverpod/GetX) and Express.js RESTful API, supporting real-time interactions and seamless user experiences for international student communities.
- Spearheaded AI integration by implementing Google Gemini via Firebase, enhancing user engagement through intelligent features and personalized in-app interactions.
- Optimized application performance and UI/UX based on real usage behavior and feedback loops, resulting in a more responsive, production-ready app deployed across multiple campuses.

PT Charoen Pokphand - Jakarta-Indonesia Feb 2025 - Aug 2025

Internship Mobile Developer

- Engineered "MyHatchery" from the ground up, developing 80% of the production-ready Flutter application within a high-speed 6-month timeline to digitalize complex hatchery operational workflows.
- Architected end-to-end core modules, including egg lifecycle tracking, incubation monitoring, and shipment management, transforming manual processes into a streamlined digital system.
- Implemented real-time data synchronization using Firebase Firestore, ensuring seamless cross-device updates and data consistency for field operational reporting.
- Translated complex business requirements into scalable UI/UX and mobile features, resulting in an intuitive inventory monitoring system that improved overall operational tracking efficiency.

Jenjang Pendidikan

Universitas Bina Nusantara - Indonesia Nov 2025 - Jun 2027 (Perkiraan)

Master of of Computer Science (Magister Teknik Informatika), 3.83/4.00

- Studying advanced computing topics including Machine Learning, Internet of Things (IoT), IT Risk Management, and Research Methodology.
- Developing machine learning models using Python for data-driven problem solving and predictive analysis.
- Exploring the application of machine learning concepts for software and mobile application use cases.
- Building strong foundations in research methodology, system evaluation, and technology risk assessment.

Universitas Bina Nusantara - Jakarta-Indonesia Aug 2022 - Oct 2025

Bachelor of Mobile Application and Technology, 3.67/4.00

- Hypernet Technologies Scholarship Recipient (Semester 3): Selected as a merit-based scholar by Hypernet Company, recognizing academic excellence and technical potential in Information Technology.
- Lead Developer for Multi-Platform Academic Projects: Spearheaded the development of "Puff and Poof" (E-commerce), "InsightED" (AI-driven Major Recommendation), and "Figure45 Store," utilizing Kotlin and Flutter with Firebase integration.
- User-Centric Design Practitioner: Executed end-to-end user research and usability testing for UI/UX projects, bridging the gap between technical functionality and intuitive interface design.

Pengalaman organisasi

BINUS English Club (BNEC) - Jakarta-Indonesia Sep 2023 - May 2024

Information Technology Staff

- Maintained and managed the organization's IT infrastructure to ensure operational stability.

- Collaborated with the IT team to develop and maintain the official BNEC website.
- Provided technical support and solutions for internal organizational needs.
- Contributed to improving the club's digital presence through technology-driven initiatives.

B-Preneur (BINUS Entrepreneurship Club) - Jakarta-Indonesia

Sep 2023 - May 2024

Member

- Participated in entrepreneurship training and workshops to develop business and innovation skills.
- Collaborated with other members in discussions and projects related to startup development.
- Gained insights into business planning, marketing strategy, and entrepreneurial mindset.

Keterampilan, Prestasi & pengalaman lain

- **Hard Skills**
- Mobile Development: Flutter & Dart (iOS, Android, Web), State Management (Riverpod, GetX), Responsive UI/UX, Reusable Widgets, Flutter DevTools.
- Database & Cloud: Firebase (Firestore, Authentication, Cloud Messaging).
- AI Integration: Google Gemini AI integration (Generative AI via Firebase).
- Software Engineering: OOP (Object-Oriented Programming), SOLID Principles, Clean Architecture (MVVM), Dependency Injection.
- Tools & Dev Ops: Version Control (Git/GitHub), CI/CD awareness, Unit Testing, Integration Testing.
- Backend & API: Node.js (Express.js), RESTful API Design, JSON, Backend Architecture.
- **Soft Skills**
- High Velocity & Adaptability
- Cross-functional Collaboration
- Problem Solving
- Analytical Thinking
- Technical Leadership
- Product Ownership
